PROFESSIONAL SUMMARY

Computer Science undergraduate with hands-on experience in Python, Flask, SQL, and web application development. Skilled in building responsive web applications, developing recommendation systems, and solving real-world problems through software development. Strong interest in Artificial Intelligence, Data Analytics, and Full Stack Development with a focus on writing efficient and scalable solutions. Seeking an entry-level Software Engineer role to apply technical knowledge and contribute to innovative technology projects.

EDUCATION

•Vignan Institute of Technology and Science	2023 - 2027
B.Tech in Computer Science and Engineering (Pursuing)	CGPA: 7.43
•SR Junior College	2021 - 2023
Intermediate	CGPA: 8.65
•Nirmala English Medium High School	2021
SSC	CGPA: 9.8

PROJECTS

•AutoMatch AI - Smart Car Recommendation System
Python, Flask, HTML5, CSS3, Bootstrap 5, JavaScript
-Developed a responsive web application that recommends cars based on user budget, preferred vehicle type, and brand.
-Built a recommendation engine using Python and Flask to dynamically filter and display suitable vehicles.
-Designed a responsive Bootstrap-based user interface with a professional landing page and recommendation dashboard.
-Integrated a dataset of 35+ vehicles including fuel type, transmission, pricing, and brand information.
-Enhanced user experience using responsive design, dynamic filtering, and recommendation cards.

CERTIFICATIONS

- ServiceNow Certified System Administrator (CSA)
- Deloitte Data Analytics Job Simulation - Forage
- Python Essentials 1 - Cisco Networking Academy
- Introduction to Modern AI - Cisco Networking Academy

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML5, CSS3, JavaScript (Basics)
Frameworks: Flask, Bootstrap
Database: MySQL
Tools: Git, GitHub, VS Code, ServiceNow
Areas of Interest: Artificial Intelligence, Data Analytics, Full Stack Development
